

Job Description

Product Design Engineer

Minima is an award winning product development company. We create, prototype and deliver commercially successful products, services and equipment using an innovation process based on an improved user experience.

A Product Design Engineer is required in the expansion of the Minima team in Suffolk, England detailing innovative new product development projects in a wide range of industries.

In addition to mechanical engineering expertise for consumer, healthcare or industrial product development, prospective candidates should possess project management skills and the ability to interact with clients when planning new jobs, running projects and presenting work.

A successful applicant is likely to be a self-motivated, independent thinker, with patience and the ability to deliver work starting from a blank sheet of paper both as part of a team and from individual initiative. A prospective candidate must be organised with good attention to detail and convey a positive attitude with a sense of humour.

Requirements include:

- Established new product development experience
- Excellent skills with Solidworks CAD software
- Project and client management experience
- Demonstrable expertise with a wide range of engineering innovation in some of the following:
 - Concept generation · Engineering analysis · Design for Manufacture in both high and low volume
 - Lab testing for both proof of principle and reliability · Materials selection
- Desire to improve professional skills
- Excellent verbal and written communication
- Perform other duties as assigned

Qualifications

- Excellent Mechanical Engineering or similar degree
- A demonstrable track record of developing new products and equipment through to market

Salary Package

We offer an attractive salary package dependent on experience

Application Instructions

Apply via e-mail to: enquiries@minima.co.uk including a CV and evidence of previous work. Postal applications are also welcome though information on CD or DVD will not be considered. Applications will be accepted until the position is filled.

Applicants should be legally entitled to work in the United Kingdom.

Recruitment, Minima Design Ltd, The Technology Centre, Framlingham, Suffolk, UK, IP13 9EZ
