

type3

The Most Complete Artistic CAD/CAM Software Solution For Die cutting

Enter a new world of opportunities with Type3 software solutions for engraving and artistic cuttings

Create your projects in less time with the utmost accuracy and high-quality results. Benefit from over 13 years of medal and coin-making expertise.

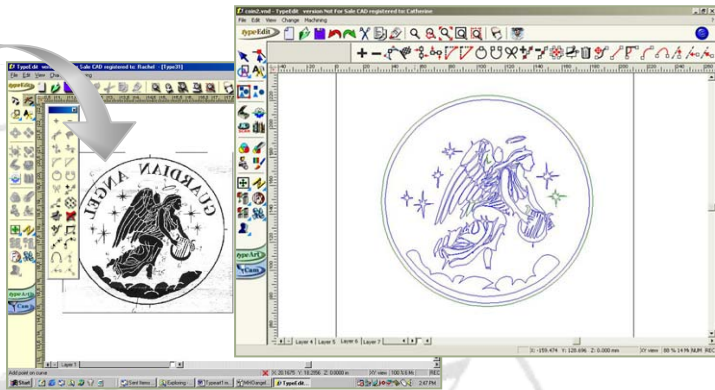

DIE CUTTING

Type3 gives you all the design, modeling and machining tools you need to create your projects. Discover some of them ...

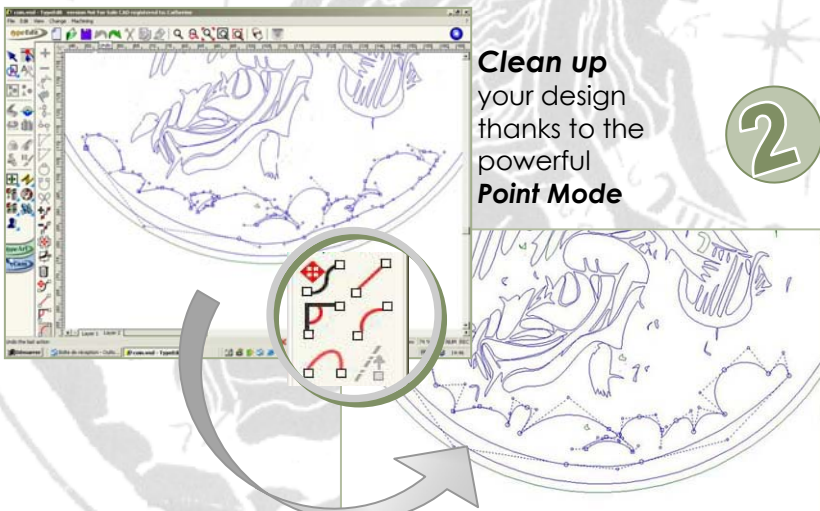

With this example you will see how to create a coin die with our 3D TypeArt module

Die cutting with Type3

From picture to vectors with one click
Scan your original photograph and vectorize it to retrieve the required contours.

Clean up your design thanks to the powerful Point Mode

Get the perfect shape
With one click in using the automatic function.

write on a curve

The Text Mode
A professional and easy-to-use tool to create and transform your text.

Apply a Mirror effect

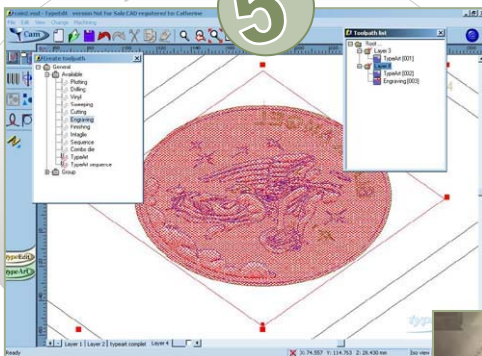

The TypeArt Module
A powerful and intuitive tool for artistic design

Creation of volume and relief on the drawing

Preview your work with The TypeView Raytracing Module

Quick and optimized machining

Save machining time with type3's powerful **multi-tool sequence mode** allowing automatic processing of toolpaths from rough to finishing.

From draft to finished piece
The Type3 solutions for engraving and cutting will take you through the entire creation process - from draft to finished project. Work faster with accuracy and security, cut costs and expand into new markets!

Type3 benefits from over 13 years of expertise, working with professionals. Today Type3 puts this incomparable know-how into offering you powerful and complete software solutions. Here are just some of its numerous features:

- Geometrical shape functions for drawing any kind of shape (sketching tool, etc.)
- Automatic layout/templates
- Numerous import filters: DXF, IGES, BMP, EPS, DXF3D, digitized, etc.
- Automatic die and stamp
- Editing tools/Cleaning tools (Point mode)
- A professional and easy-to-use text mode (TrueType fonts, single-line fonts)
- Artistic 3D creation tool
- Surface tools including mapping
- Specific Job tools: Drilling mode, Nesting, Ridge, Dial wizard
- Texturing modes: fractal, spread
- 2D, 2.5D and 3D Milling
- Specialized toolpaths (Intaglio, 3D cutting, tangential entry, finishing)
- 2D/2.5D/3D multi-tool sequence
- Multipass global or pocket machining
- Z Ramping plunge
